

UNIVERSITY OF ALBERTA

# Research Weekly Report

From 2022-07-11 to 2022-07-17

Hanshi Sun

---

I'm sorry for sending this week's report late. I just came back to UofA from the 3 days Banff Trip which is organized by UAL.

## 1 Paper Reading

I have finished reading of the survey paper "[Deep Learning for Anomaly Detection: A Survey](#)". I found a useful repo in GitHub [hoya012/awesome-anomaly-detection](#), which is a curated list of awesome anomaly detection resources, inspired by [awesome-architecture-search](#) and [awesome-automl](#). I am keeping reading the paper in the list at the present. Moreover, I have met Tushar face-to-face.

P.S. Jinan has not replied to my email yet. Therefore, I have not obtained the related resources yet.

## 2 Open Source Code

Nothing update.

## 3 Plan for Next Week

Next week, maybe we can have a weekly meeting and try to get contact with Jinan in that you will be back from UK.
